The Car Without Experiments

THERE's never any doubt about value when you buy a Ford car. You know it's all right or Henry Ford wouldn't put it out. One thing that never changes is his policy of dependable transportation at low cost.

That's the biggest feature of the New Ford. The reliability and economy of its V-8 engine have been proved on the road by upwards of 1,400,000 motorists. Owner cost records show definitely that the Ford V-8 is the most economical Ford car ever built.
